

## A Path Towards Health Data Utility

***HIE Roundtable in partnership with the Maryland Health Care Commission and the Association for State Health IT Leaders***

April 25, 2022

# Housekeeping Reminders

- This is a Zoom meeting.
- Please **mute** yourself when you are not actively speaking.
- Please use the **raise hand** function to chime in with questions or comments and/or use the **chat** to share.
- Please share video if you are able.

# Agenda

- **Welcome** – Jolie Ritzo, *Civitas Networks for Health*, Alana Sutherland, *Maryland Health Care Commission*
- **Feature** – John Kansky, *Indiana Health Information Exchange*
- **Discussion on HDU Framework Summary of Roundtable Takeaways** – Kate Ricker-Kiefert, *Civitas Networks for Health/Association for Health IT State Leaders*
- **Looking Ahead** – Lisa Bari, *Civitas Networks for Health*
- **Closing and Next Steps** – Alana Sutherland, *Maryland Health Care Commission*

# HIE Roundtable Series Objectives

Convene HIE and state leaders to learn, share and advise on key considerations for a health data utility model.

Gather information that will inform development of a health data utility framework.

# Feature

***John Kansky, Indiana Health Information Exchange***

Indiana Health  
Information Exchange

**Better Outcomes. Delivered.**

**Clarifying the HDU Concept  
(and thoughts on the HDU Brand)**

# What is a Health Data Utility?

- What is a Health Data Utility?
  - Clarifying this “squishy” concept (and making it less “squishy”)
  - Get us all thinking and talking about it in a more consistent way
- How are HDUs different from a traditional Health Information Exchange and/or RHIC?

# What is a Health Data Utility?

- **Kansky disclaimer**
- A Health Data Utility (HDU) is an emerging concept.
- An HDU is an organization that serves the health data/analysis needs of its state – both the private-sector (healthcare providers, payers, employers) and state government.
  - Therefore... HDUs must have cooperative relationships with state government... and any other sector they serve.
- HDUs are not-for-profit organizations (or possibly state-government run).
- There are many organizations that exist across the country, including IHIE, that resemble the HDU model.

# How is it different from a Health Information Exchange?

**HIE**

**HDU**

**RHIC**

- Everyone here knows generally what HIEs and RHICs do.
- But in each state there are many programs, functions, and needs requiring the secure exchange, curation and/or analysis of health data not typically performed by HIEs and/or RHICs.
- Increasingly, these functions are being aggregated into a single statewide not for profit organization... a statewide health data utility (HDU).

# Clarifying Our Mental Model of HDU

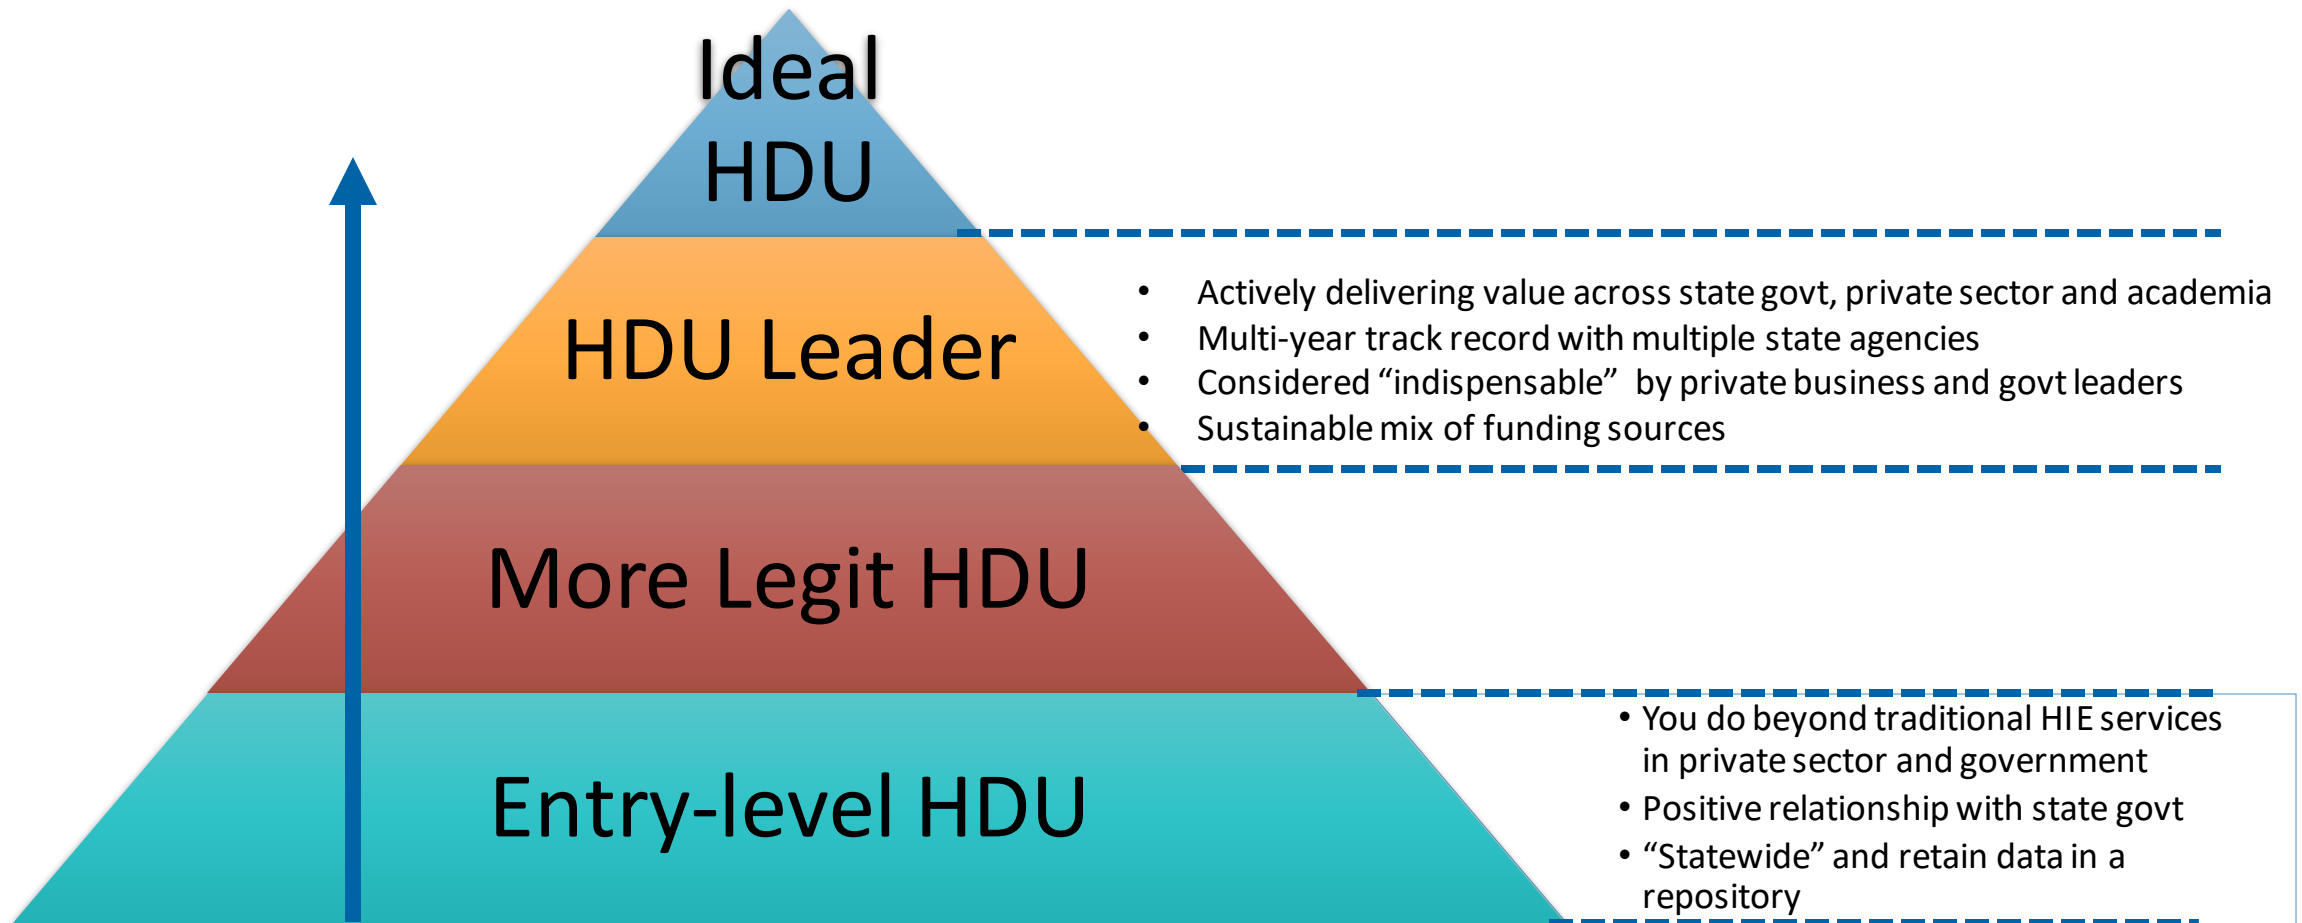

- An HDU definition should not constitute a binary litmus test for whether an organization is or is not an HDU
- BUT...
  - Every state have an HDU
  - Every state has a different set of circumstances

- **A suggestion/recommendation:**

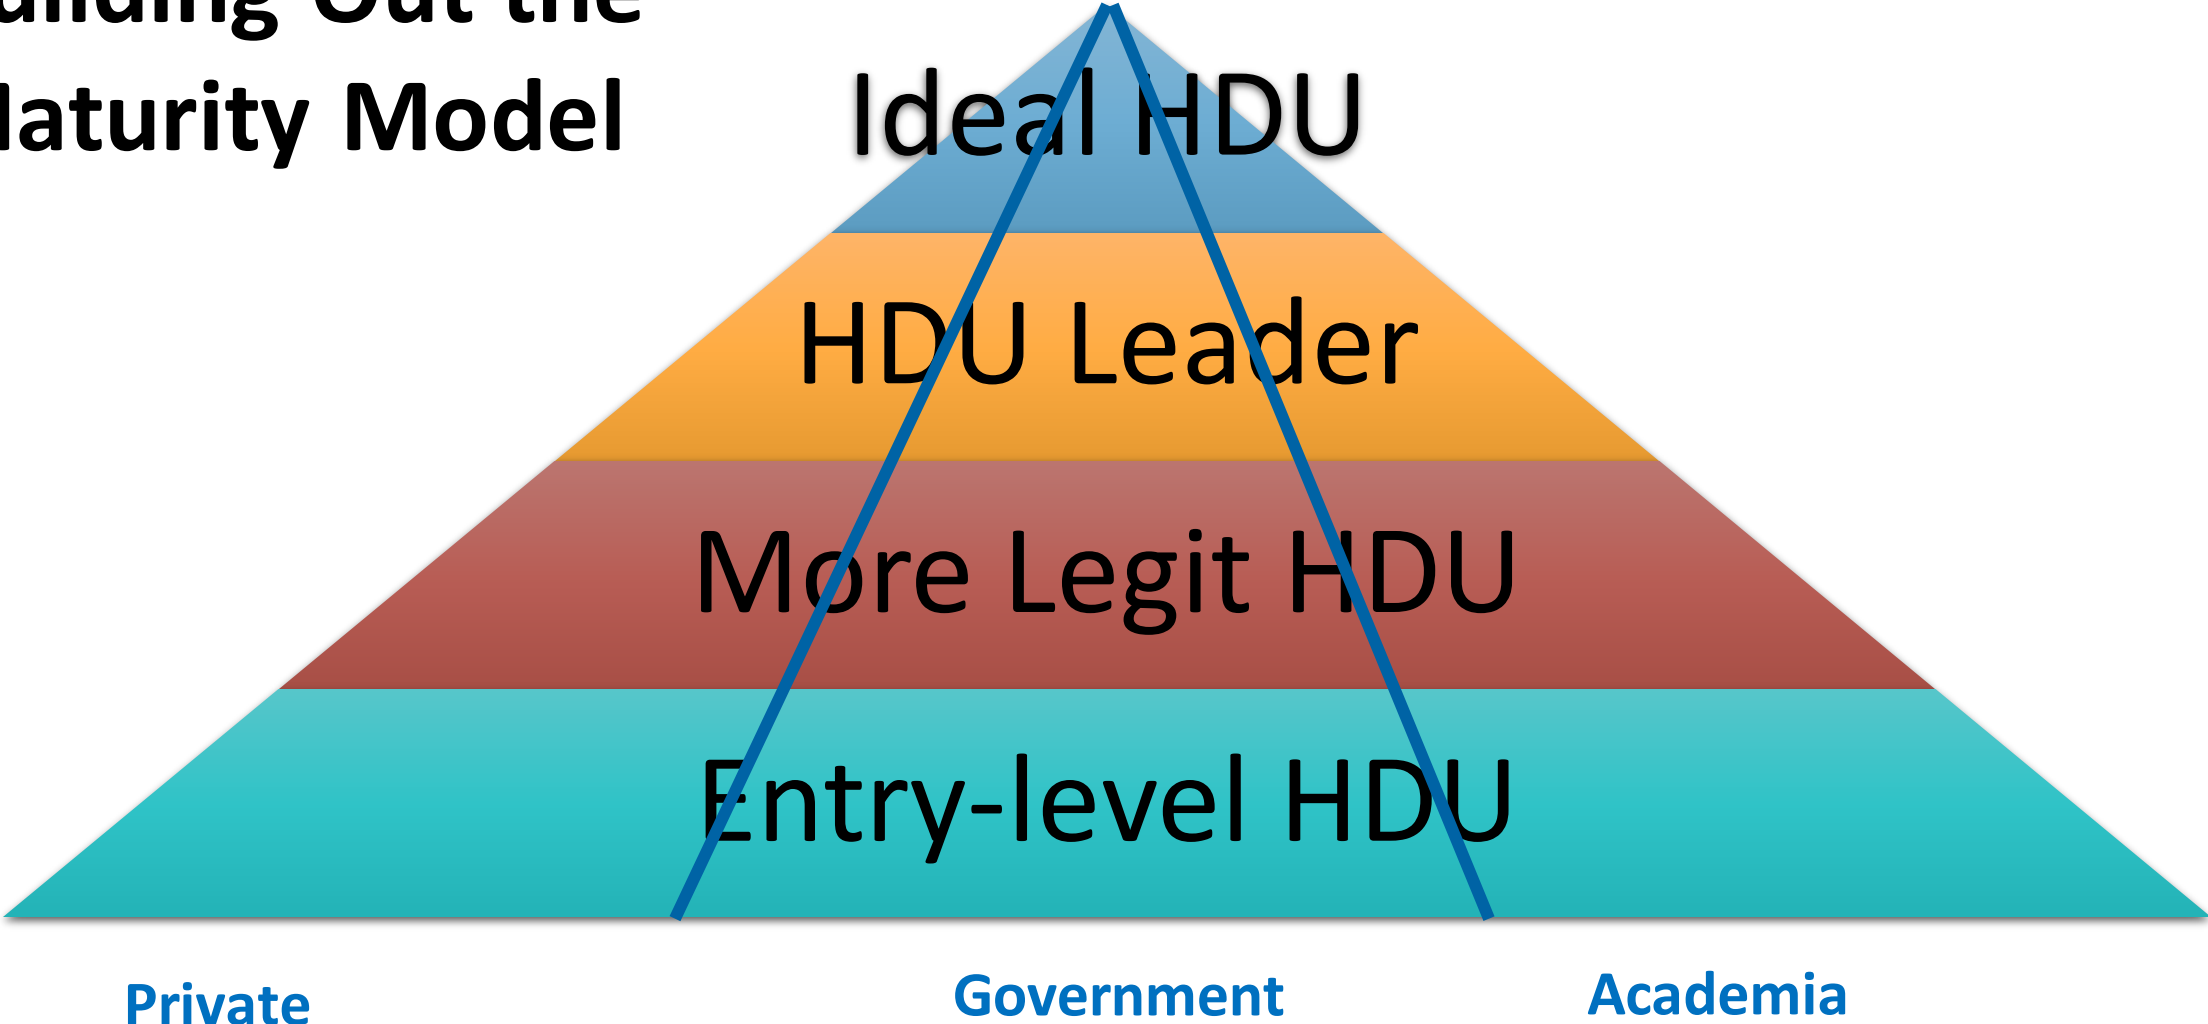

*Civitas should develop a maturity model to help the industry better understand HDU and therefore apply the concept more consistently*
