CIVITAS MEMBER/PARTNER COMMUNICATIONS TOOLKIT

In October of 2021 Civitas Networks for Health was formed. Since then, the network has made strides – becoming the bridge between data and doing by offering educational events, promoting collaboration, and offering impactful programs in support of our member initiatives. Our network is growing, bringing on aligned members who are committed to advancing health equity, quality improvement, and interoperability.

It is critical to the success of Civitas that we utilize our network, and the networks of our peers, partners and members, to communicate news, updates, and events. **The following is a communications toolkit, including sample social media posts and additional information that can be distributed through your various communications platforms.**

In addition to the text below, partners and members are encouraged to continue sharing why you are excited and proud to be part of Civitas, your involvement with Civitas events, or the accomplishments of fellow member organizations. Content on all Civitas channels can also be repurposed, retweeted, and shared as appropriate. Thank you for your partnership and helping us spread the word about our collective work!
